Shopping With Mother

Read and answer the questions please.

I walked into the store with my mom to buy supplies for school. She was carrying a basket full of notebooks, pencils, pens, and other things I thought were needed for school.

“What should we get first?” she said as she started looking around the hall.
“A notebook to take notes in or maybe some more pens?”

I looked to the left at all the notebooks on display near us and pointed one out that had two blank pages at the top where you could write your name down. “How about this one? It has space up there so you know who it belongs to if someone takes it!”

1. Where are they going?
2. Why are they buying pens and notebooks?
3. What are they planning to buy first?
4. How does she explain the notebook to her?
5. Where do you buy school supplies?
6. Do your parents help you buy school supplies?
