

Reading comprehension for Grade 3 or 4

Don't Put All Your Eggs in One Basket.

Tigers are majestic creatures, but they are also threatened by extinction.

We can save the tigers from extinction. It might seem

impossible to save them since they have been hunted for so long and there aren't as many as there used to be. However, the truth is that if we all work together, we have chances.

1. Write a title for the above paragraph.
2. What is the topic of the paragraph?
3. Do tigers get hunted?
4. How can we prevent tigers from going extinct?

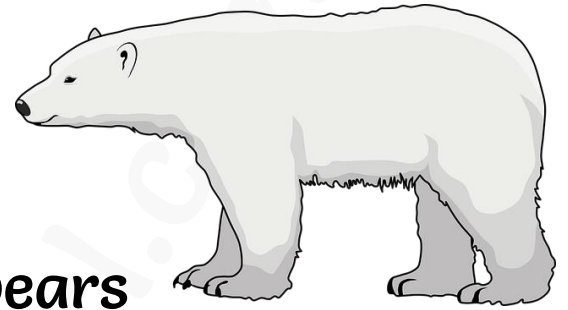

Giraffes are the tallest mammals on Earth. They can grow to a height of 6.5 m and weigh up to 1,400 kg.

Giraffes have a long neck that allows them to reach higher leaves on trees. They also use their necks for fighting and mating. They eat a lot of leaves and fruit - up to 75 pounds per day!

1. Provide a title to the paragraph above.
2. In the above paragraph, what animal are we talking about?
3. What is the maximum weight a giraffe can reach?
4. What are some of the ways that giraffes use their neck?

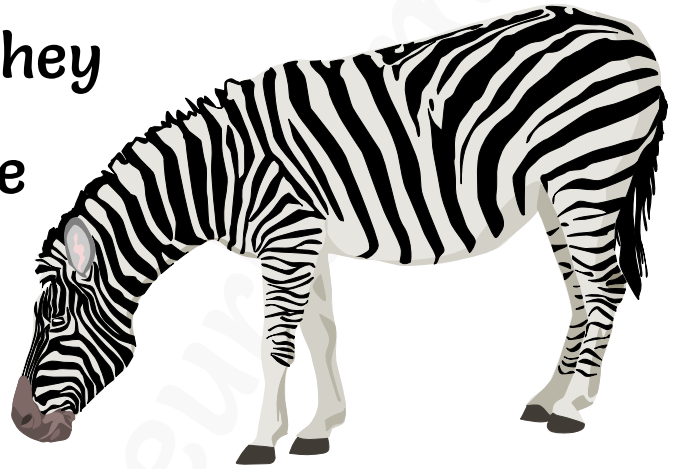

The polar bear is a mammal that lives in the Arctic. Polar bears are typically white or pale yellow in color.

Besides their black skin, polar bears have two layers of fur - one is dense and fluffy for keeping them warm during the winter season while the other is thin and smooth when it starts to warm up.

1. Provide a title to the paragraph above.
2. In the above paragraph, what animal are we talking about?
3. What color is the polar bear's skin?
4. How does the fur benefit polar bears?

Zebras are fascinating animals. We mostly find them in Africa and Asia. They are social animals that live in herds with females, juveniles, and males. The zebra lives in herds of 50-300 individuals in the grasslands of Africa. The stripes help them keep cool and scare away predators.

1. Provide a title to the paragraph above.
2. In the above paragraph, what animal are we talking about?
3. In what kind of environment do zebras live?
4. What are the benefits of the stripes?
