

# Reading comprehension for Grade 3 or 4

Don't Put All Your Eggs in One Basket.

My school is a great place! I have a lot of friends here and my teachers are really nice. My favorite class is art, but I also like science and math. In my free time, I like to play soccer with my friends. I think

everyone should go to school because it's fun and you learn a lot of new things! My English teacher is Mrs. Nguyen and my math teacher is Mr. Truong. They are both really great teachers!

The classroom is really fun! We have a Smartboard and we can use the computer. Sometimes my friends and I play games on the computer in class. We also have a lot of books to read and we can draw in our art notebooks.

- 
1. What are we talking about?
  2. What is my favorite class?
  3. What is the name of my math teacher?
  4. What are some of the advanced things used in the classroom?
  5. Why should we go to school?

Hi, everyone! I'm here to talk about school. More specifically, I want to introduce you to my friends who I spend all day with at school.

My first friend is Jane. We sit together in class and always have interesting conversations about the topic at hand. Sometimes we giggle together when the teacher is looking away.

My another friend is James. He's really smart and often helps me understand the material when I don't get it. We sometimes work on problems together during our free time.

Lastly, there's Ben. He's always joking around and making everyone laugh. Even when we're doing our homework he'll find a way to make it fun.

I'm really happy that I have many friends at school that I can rely on and enjoy spending time with. Friendship is an important part of school life!

- 
1. What is the author talking about?
  2. What are the names of the friends?
  3. Which friend is helping me in studies? How does he help me?
  4. Who is a fun friend to me? How does he make fun?
  5. Explain the importance of friendship in school life?

Hi, I'm Sarah. I go to a school where we learn about things that happen on farms. For example, we learned about how cows, pigs, and hens live on a farm.

It was really interesting to learn about how they live and what they do. For example, we learned that cows eat hay and grain, and that pigs eat slop and corn. We also learned that hens lay eggs, and that sometimes the eggs are brown and sometimes they're white.

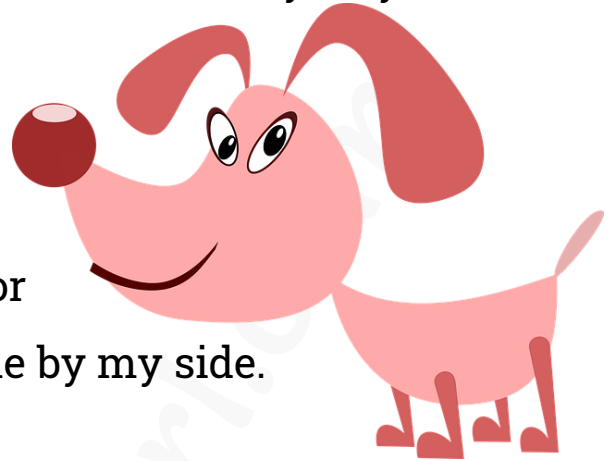

Let me talk more about cows. Cows are big animals. They are brown and white. They have four legs and a tail. Cows eat grass and drink water. Farmers milk cows to get milk for people to drink. Milk is good for you. It has calcium in it.

It was fun to learn all this stuff about where our food comes from. I'm so glad I go to a school that teaches us about things like this!

- 
1. What is the author talking about?
  2. In a farm, what is the cow's role?
  3. What are the foods cows and hens are fed?
  4. Where do we get food from?
  5. Explain the different types of eggs?

Having a dog is like having a best friend who is always loyal and helpful. My dog is always there for me, understanding what I am feeling and wanting to help in any way she can.

Dogs are known as man's best friend for a reason, and I am grateful to have mine by my side.

She is always happy to see me, wagging her tail energetically and licking my face with joy. We go for walks together, play fetch in the park, and just relax on the couch watching TV. I couldn't ask for anything more in a companion, and I know that my dog feels the same way about me. We are two peas in a pod, and I wouldn't trade her for the world!

Dogs are loyal until the end, and my dog is no exception. She is my friend, and I am grateful for everything she has done for me.

- 
1. Describe the characteristics of the dog in this reading passage.
  2. What makes dogs our best friends?
  3. What is the dog's way of showing her love?
  4. How does the author spend time with his dog?
  5. What are the unique characteristics of dogs?
