

# The world's oceans

The world's oceans can be divided into five different oceans: the Pacific, Atlantic, Indian, Southern, and Arctic oceans. The Pacific Ocean has the longest coastline, while the Southern ocean has the shortest.

The average depth of the Pacific Ocean is around 4,000 meters, while the average depth of the Atlantic Ocean is 3,500 meters.

There are a total of seven continents on Earth: Europe, Asia, Africa, North America, South America, Australia, and Antarctica. Asia is the largest continent, while Australia is the smallest.

## Questions

1. What are the five oceans?
2. Which ocean has the most coastline?
3. What is the average depth of the Pacific Ocean?
4. How many continents are there?
5. What is the largest continent?
