

Beauty is in the eye of the beholder

A beautiful woman went to a fortune teller to ask about her future. The fortune teller told her that she would live a long and prosperous life.

However, the woman was not satisfied with this answer. She wanted to know if she would be beautiful forever.

The fortune teller told her that beauty is in the eye of the beholder. This means that everyone has their own definition of beauty. The woman was not happy with this answer either. She wanted to know if there was any way to guarantee that she would always be considered beautiful.

The fortune teller told her that there is no guarantee in life. However, she said that the best way to ensure that you will always be considered beautiful is to be kind and loving to others.

Her life was changed when she met a princess who was more beautiful than she. However, the princess acted arrogantly and proudly towards her villagers. She was always rude and spoke badly about them.

The people were always worried to see her coming because they knew that she would only bring them trouble. However, the same people enjoyed talking to the beautiful woman. She was surprised to see that people were more interested in talking with her than the princess.

The woman realized that the fortune teller was right. Beauty is in the eye of the beholder. It is not about how you look on the outside, but about how you treat others.

The beautiful woman realized that being beautiful on the outside doesn't mean you are beautiful on the inside. She learned that it is more important to be kind and loving to others. And in the end, she was the one who was truly beautiful.
