The Four Seasons

There are four seasons in a year: spring, summer, fall, and winter. Each season has its own weather and characteristics. Spring is when flowers start to bloom and the weather gets warmer. Summer is hot and there are long days. Fall is when the leaves change color and fall off the trees. Winter is cold and there are shorter days.

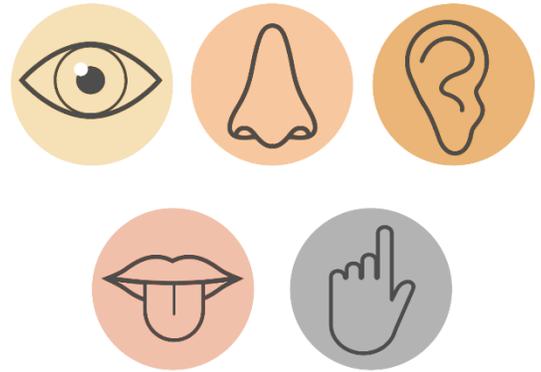

Questions:

1. How many seasons are there in a year?
2. What is the weather like in spring?
3. What happens to the leaves in fall?
4. Is it cold or hot in winter?

The Five Senses

We have five senses that help us learn about the world around us. Our senses are seeing, hearing, smelling, tasting, and touching. We use

our eyes to see, our ears to hear, our nose to smell, our tongue to taste, and our skin to touch. Our senses help us understand and explore the world around us.

Questions:

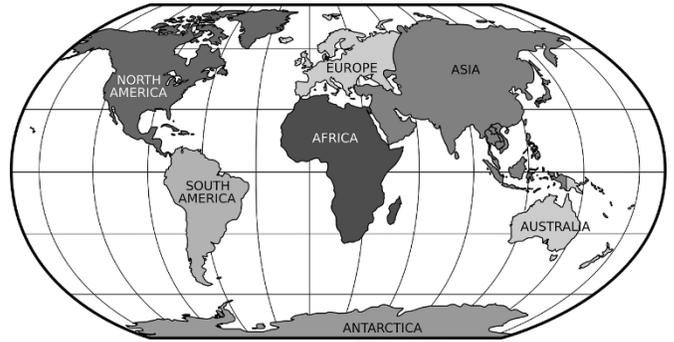

1. How many senses do we have?
2. What do we use our eyes for?
3. What do we use our ears for?
4. What do we use our nose for?

The Continents

There are seven continents on Earth: Africa, Antarctica, Asia, Australia, Europe, North America, and South America.

Each continent is made up of different countries and has its own unique culture, languages, and landscapes.

Africa is the second largest continent and is home to the largest desert, the Sahara. Antarctica is the coldest and driest continent, and is mostly covered in ice. Asia is the largest continent and has the highest population. Australia is the smallest continent and is home to many unique animals, such as kangaroos and koalas. Europe is known for its diverse culture and history. North America is home to many different landscapes, including forests, mountains, and deserts. South America is home to the Amazon rainforest and the Andes mountains.

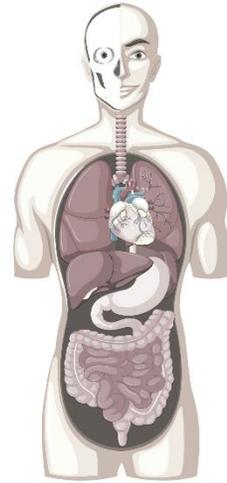

Questions:

1. How many continents are there on Earth?
2. What is the largest continent?
3. What is the smallest continent?
4. What is South America known for?

The Human Body

The human body is made up of many different parts and systems that work together to keep us healthy. Our body is divided into two main parts: the head and the trunk. The head includes the brain, the eyes, the nose, and the mouth. The trunk includes the chest, the stomach, the arms, and the legs.

Inside the body, we have organs that help us digest food, breathe, and pump blood. We also have bones that give our body support and muscles that help us move. Our skin is the largest organ of the body and protects us from the outside world.

Questions:

1. What is the human body made up of?
2. What is the head of the body made up of?
3. What is the trunk of the body made up of?
4. What is the largest organ of the body?
