

Lions – Reading Comprehension

Lions are one of the most popular animals in the world. Kids love to learn about these fierce predators, and adults can't get enough of their majesty. Here are some interesting facts about lions that your students are sure to enjoy.

Lions are the largest cats in the world. Male lions can weigh up to 550 pounds, while females can weigh up to 330 pounds.

Lions live in Africa and India. In Africa, they can be found in sub-Saharan regions like Kenya and Tanzania. In India, they can be found in the Gir Forest National Park.

Lions are carnivores, which means that they eat meat. Their diet consists mostly of zebra, antelope, and wildebeest.

Lions are social animals. They live in groups called **prides**, which can consist of up to 30 lions. Each pride has its own territory, which it defends against other prides.

Lions are very powerful animals. They can run up to 50 miles per hour (80 kph approximately) and leap up to 35 feet in the air. They also have very sharp claws and teeth that they use to kill their prey.

Lions are an endangered species. There are only about 20,000 lions left in the wild as of 2022. This is due to habitat loss and hunting by humans.
